EDUCATION

University of Santo Tomas

June 2026

Bachelor of Science in Computer Science, Specialization in Data Science

- Coursework: Data Structures and Algorithms, Software Engineering, Data Warehousing, Machine Learning

SKILLS

Languages & Technologies: JavaScript (ES6+), HTML5, CSS3, TypeScript, React, Vite, Context API, Tailwind CSS, shadcn/ui, Node.js, Express, PostgreSQL, Python

Tools & Platforms: Git, GitHub, GitHub Copilot, ChatGPT, Claude, Figma, Docker, Visual Studio Code

Practices: Object-Oriented Programming, Performance Optimization, Web Application Security, Accessibility (WCAG), Agile/Scrum, SEO, REST APIs

EXPERIENCE

Bank of the Philippine Islands

Feb 2026 - May 2026

Process Modelling and Technology Adoption Intern

- Designed and built 3 responsive React microsites for Open Banking integrations in a commercial banking environment, collaborating with cross-functional business units through daily standups

TECHNICAL PROJECTS

BPI Automated Certificate Generation System

May 2026

Typescript, Node.js, Express, React, Vite, Tailwind, shadcn/ui, PostgreSQL

Reduced certificate generation time across 14 document templates by implementing automated Playwright-based PDF rendering in a React and TypeScript web application

- Developed responsive React interfaces, secured with access-token JWT authentication across multiple user roles, enabling seamless experiences across devices through a reusable component architecture
- Implemented backend architecture with Zod-based environment validation, structured logging, and centralized error handling to improve reliability and maintainability

BPI Complaint Management System

February 2026

Javascript, Node.js, Express, React, Tailwind, shadcn/ui, PostgreSQL

Built a full-stack admin dashboard with 12+ REST API endpoints, role-based access control, bcrypt password hashing, httpOnly cookie sessions, and parameterized queries across admin and user workflows

- Optimized React application performance to achieve a 100/100 Lighthouse score with 0.4s First Contentful Paint and 0ms Total Blocking Time in a React frontend with self-hosted fonts, context-based authentication, protected role-aware routing, and reusable Tailwind UI components
- Documented API contract in Markdown to define request/response structures and support integration and maintainability across the application

P.R.I.S.M: Patient Record Integration Scheduling and Management

April 2024

Javascript, Node.js, React, Vite, Tailwind, PostgreSQL

Independently developed the front-end of a full-stack patient records management system for a beauty clinic, serving multiple user roles across scheduling, records, and reporting workflows

- Designed a scalable Figma design system defining information architecture, typography scales, and responsive grid layouts to serve as the foundational framework for the entire development workflow
- Reduced manual reporting effort by building custom PDF export functionality with jsPDF, enabling users to generate filtered reports with selectable columns and date ranges

CERTIFICATIONS

freeCodeCamp Front End Development Libraries

May 2024

freeCodeCamp JavaScript Algorithms and Data Structures

July 2024

freeCodeCamp Responsive Web Design

January 2023
