EDUCATION

University of Santo Tomas

June 2026

Bachelor of Science in Computer Science, Specialization in Data Science

- Coursework: Data Structures and Algorithms, Software Engineering, Data Warehousing, Machine Learning

SKILLS

Languages & Technologies: React, TypeScript, JavaScript (ES6+), HTML5, CSS3, PostgreSQL, Node.js, Express, Python, Next.js, Tailwind CSS, Axios, Vite, shadcn/ui, Context API

Tools & Platforms: Git, GitHub, GitHub Copilot, Claude, ChatGPT, Visual Studio Code, Figma, Docker, Vercel

Practices: REST APIs, Responsive Web Design, Accessibility (WCAG), Database Design, Reusable Component Architecture, Web Application Security, Object-Oriented Programming

EXPERIENCE

Bank of the Philippine Islands

February 2026 - May 2026

Process Modelling and Technology Adoption Intern

- Designed Figma prototypes and developed **3** React microsites supporting Open Banking integrations, implementing design-to-development workflow for **2** microsites and direct implementation for **1**
- Gathered requirements directly from the project's business stakeholders (PM/BA team) to scope development work

TECHNICAL PROJECTS

BPI Automated Certificate Generation System

May 2026

Typescript, Node.js, Express, React, Vite, Tailwind, shadcn/ui, PostgreSQL

Built a full-stack internal tool automating certificate generation across **14** document templates using Playwright-based PDF rendering, a Node.js/Express backend, and a React/TypeScript frontend

- Implemented JWT authentication with role-based access for requester and approver roles, restricting certificate actions based on user permissions

BPI Complaint Management System

February 2026

Javascript, Node.js, Express, React, Tailwind, shadcn/ui, PostgreSQL

Built a full-stack admin dashboard with **12+** REST API endpoints, role-based access control, bcrypt password hashing, httpOnly cookie sessions, and parameterized queries across admin and user workflows

- Optimized React application performance to achieve a **100/100** Lighthouse score with 0.4s First Contentful Paint and 0ms Total Blocking Time in a React frontend with self-hosted fonts, context-based authentication, protected role-aware routing, and reusable Tailwind UI components
- Attained **100/100** Lighthouse SEO and accessibility scores with a **0.6s** Largest Contentful Paint through semantic HTML5 markup, ARIA labeling, and structured heading hierarchy

P.R.I.S.M: Patient Record Integration Scheduling and Management

April 2024

Javascript, Node.js, React, Vite, Tailwind, PostgreSQL

Built the design system from scratch and the front-end for a patient records management system for a beauty clinic, consuming a partner-built backend via REST APIs

- Created a Figma design system from scratch, defining semantic design tokens, typography, spacing, and component states/types, which served as the foundation for **14** pages/views
- Implemented role-based views for scheduling, records, and reporting workflows, integrating with a partner-built backend via Axios

CERTIFICATIONS

freeCodeCamp Front End Development Libraries

May 2024

freeCodeCamp JavaScript Algorithms and Data Structures

July 2024

freeCodeCamp Responsive Web Design

January 2023
